Trail Distances* from Bridge to Bridge
 (approximate roundtrip "loop" mileage displayed)

* All loops follow routes including the pedestrian ramps along the trail. The distance for the Congress bridge was calculated by looping around the Hyatt and merging with the trail near the South First Street bridge. The distance for the Pflugler pedestrian bridge was determined by using the spiral ramps at both ends of the bridge. Note that paths and pedestrian bridges are located under the MoPAC expressway and interchange.

Special Note: the Town Lake "hike & bike" cinder path ends, however trail continues along Lakeshore/Riverside. Exercise extreme caution when crossing over Interstate 35!
